SUMMARY

Information Science undergraduate with an 8.9 CGPA and strong foundations in Data Structures & Algorithms, OOP, DBMS, Operating Systems, and Computer Networks. Skilled in Java and full-stack development with React, TypeScript, Node.js, Express, and PostgreSQL, with hands-on experience building real-world software applications.

EDUCATION

Dayananda Sagar College of Engineering
Information Science and Engineering

Bangalore, Karnataka, India
CGPA: 8.9 — Oct 2023 – Present

BGS PU College
PUC (PCMB)

Bangalore, Karnataka, India
Score: 96.83% — June 2021 – April 2022

PROJECTS

Expense Splitter

GitHub

React, Vite, Node.js, Express, PostgreSQL, JWT, Tailwind CSS

- **Designed and developed a full-stack expense management platform** enabling groups to track shared expenses and calculate member balances with equal, exact, and percentage-based splitting.
- **Implemented JWT-based authentication** with bcrypt password hashing and protected API routes, along with group/member management and settlement tracking using Node.js, Express, and PostgreSQL.
- **Developed a debt-simplification algorithm** using a greedy minimum-cash-flow approach to reduce complex group debts into a minimal set of settlement transactions.
- **Built and deployed the responsive React frontend and RESTful backend** using Vercel and Render, with PostgreSQL hosted on Neon and environment-based production configuration.

AI Sentinel (AI Quality & Observability Platform)

GitHub

React.js, TypeScript, Node.js, Express.js, PostgreSQL, Prisma, REST APIs

- **Contributed to an AI observability platform** to monitor LLM interactions and evaluate responses for quality, safety, and hallucination risks.
- **Provides a centralized dashboard** to view AI evaluation results, risk levels, and conversation insights through REST APIs.
- **Contributed to developing responsive dashboard views** using React.js and TypeScript, integrating REST APIs to fetch and display application and evaluation data.
- **Implemented user authentication and API-key-based access control** using Express.js middleware, integrating secured endpoints with PostgreSQL through Prisma ORM.

MediFusion (Personal Health Management Platform)

GitHub

React.js, TypeScript, PostgreSQL, Supabase, REST APIs

- **Contributed to a health management platform** for tracking vitals, symptoms, medications, mood, and health records in a centralized dashboard.
- **Integrated AI-powered health insights** and wearable data synchronization to help users monitor and manage their health information.
- **Developed responsive dashboard components** using React.js and TypeScript, integrating REST APIs to fetch and display user health data.
- **Worked with PostgreSQL and Supabase** to manage user health records, implementing authentication, authorization, and Row-Level Security (RLS) for user-specific data access.

TECHNICAL SKILLS

Programming Languages: Java, JavaScript (ES6+), TypeScript

Frontend: React.js, HTML5, CSS3, Tailwind CSS, Bootstrap

Backend: Node.js, Express.js, REST API's

Database: PostgreSQL, MongoDB

Computer Fundamentals: Database Management Systems, Operating Systems, Computer Networks

Tools: Git, GitHub, Postman, VS Code

Core Competencies: DSA, Low-Level Design (LLD), Object-Oriented Programming (OOP)

CERTIFICATIONS

Java – Udemy

Cloud Computing – NPTEL
